

**CERASHINE.COM**  **MADE IN THE USA**

**PROFESSIONAL GRADE CERAMIC SPRAY**

Check us out at  
**CeraShine.com**

**Please Note**

**APPLICATION, PLEASE READ FIRST!**

**MUST BE APPLIED IN COOL SHADED AREA**

**DO NOT APPLY ON HOT SURFACES OR IN DIRECT SUN!**

**Wash your car and remove old wax & Silicones oils off surface, dish soap or auto compound removes wax, Also 10% rubbing alcohol in a bucket of warm water will remove old wax. (If needed) use a clay bar. Prepping Makes this product that much better in the end results. If your paint is in new condition then just remove the old wax and apply the coating. Treat this as your base. Your results may vary if you don't follow the directions!**

1. Work in areas about half the size of a car door or half the hood.
2. Generously spray a light mist over a cool surface.
3. Using a new 300gsm microfiber, BUFF within 30 seconds of spraying that one panel
4. Using the same microfiber Towel, **KEEP BUFFING** that area and keep flipping the towel over.
6. Move on to the next area once you are happy with the results on that particular panel

**Do not spray all over the car at once, Do one panel at a time!**

**Don't get it dirty or wet for 12 hours, do not reuse the microfiber towel after 12 hours! If you need more, please visit our site at CeraShine.com  
It can take 24 hours to "fully" cure but drivable after 2 hours if you need to drive it home in a short distance.**

**Left over ceramic needs to be stored with the cap back on up right in a dry area**

Hand washing with quality car soap helps keep the ceramic coating to last longer  
You can always add more coatings!

**IF YOU NEED TO REMOVE THE CERAMIC COATING USE DISH SOAP IN A BUCKET OF WATER OR AUTO COMPOUND**

**PRECAUTIONS:**

**PRECAUTIONS:**

- Contact with eyes may cause irritation.
- We recommend using rubber gloves and eye protection when applying ceramic coating; prolonged contact with skin may cause drying.
- Excessive inhalation of vapors can cause nasal irritation, dizziness, weakness, nausea, headache and a narcotic reaction.
- If swallowed, it may cause stomach cramps, nausea, vomiting.
- Do not ingest.
- Use within one year from purchase. **KEEP IN A COOL DRY AREA UP RIGHT.**
